

- According to DIN EN 61810-1, DIN EN 61810-3 (Type A), DIN EN 45545 (fire protection on railway vehicles)
- With forcibly guided contacts
- Safe separation between coil/contact and contact/contact for applications at pollution degree 2 with rated insulation voltage 250 V
- Clearance and creepage distances:
Contact - coil ≥ 5.5 mm
Contact - contact ≥ 5.5 mm
- Low nominal and holding power
- High mechanical service life
- Smallest height with only 10.3 mm
- RoHS compliance
- Placing SMD components between PCB and relay is possible

Applications

- Switchgear for safety technology
- Safety controls
- Escalators and walkways
- Elevators for men and load
- Press controls
- Railway technology

A large grid of graph paper. The grid consists of 20 columns and 30 rows. The grid lines are composed of solid and dotted lines in an alternating pattern. The first vertical line and every second vertical line are solid. The first horizontal line and every second horizontal line are solid. This creates a pattern of solid and dotted lines that forms a grid suitable for technical drawing or engineering.

A vertical column of horizontal lines on the right side of the page, intended for writing. It consists of 30 horizontal lines, one for each row of the grid, providing a space for notes or calculations.
